

## 一. Performance

|                         |   |
|-------------------------|---|
| Part Number             | $\Phi 40 \text{ } 16\Omega \text{ } 1W \text{ L-KLS3-4016}$ |
| Impedance               | $16 \pm 20\%$ at 1 kHz                                      |
| Sensitivity             | $102 \pm 2 \text{ dB}$                                      |
| Frequency Response (F0) | 550Hz-650Hz   |
| Test Equipment          | JH6160(R)   |
| Voltage Input           | 1.5V  |

## 二. Environmental performance

|                              |   |
|------------------------------|---|
| Operating Temp               | -5°C to +40°C                               |
| Operating Humidity           | 30% ~ 75% RH (NO dew condensation)          |
| Storage Environment Temp     | -5°C to +40°C                               |
| Storage Environment Humidity | 20% ~ 80% (Water vapor pressure 6643pa Max) |
| Storage Life                 | 1 year                                      |
| Defective products           | 10ppm Max                                   |

### 三. Reliable performance

| Performance            | Items                  | Condition   | Performance Requirements | Equipment           |
|------------------------|------------------------|---|--------------------------|---------------------|
| Electrical Performance | High temp resistance   | 50°C±2°C 30 hours   | No deformation           | Oven                |
|                        | Low temp resistance    | -5°C 30 hours   | No deformation           | Freezer             |
|                        | hot & cold impact      | -5°C-50°C 30min each, temp change under 10Min. 50 times cycle   | No deformation           | Oven& Freezer       |
|                        | Wet&heat resistance    | Temp:50±2°C Humidit: 80%30 hours  | No deformation           | Humidifier & Oven   |
| Welding Performance    | Weldability            | Soldering iron Temp : 200±5°C 3±0.5s  |                          | Soldering iron      |
|                        | Welding heat resistant | Using Soldering iron at temp 200±5°C lasts for 2.5sec.  |                          | Reflow              |
| Mechanical Performance | Vibration              | Vibration Frequency: 10-45HZ; Range: 1mm Acceleration: 10G; Vibration Change 10~45~10HZ; X,Y,Z Shaft vibration time 1 hour each | Can work normally        | External inspection |
|                        | Drop Test              | 从 75±5CM height drop to 2CM thickness board for 3 times   |                          | Self-made Tool      |

\* The above electrical test equipment is 200 B, test after 1 hour.

#### 四: Appearance

| Name                  | Size (mm) |
|-----------------------|-----------|
| OD of the speaker     | 40±0.3mm  |
| Height of the speaker | 5.5±0.3mm |
